Volume 50: Number 10

## OCTOBER MEETING

**Topic: Mini and Compact Cattleyas**

**Speaker: Fred Clarke**  
**Sunset Valley Orchids**

**8:00 pm Monday, October 12**  
**Atlanta Botanical Garden, Day Hall**

Fred Clarke started Sunset Valley Orchids in 1995 as a natural outgrowth of a hobby that began 22 years earlier. Sunset Valley Orchids is a "Boutique" style nursery where we are dedicated to providing excellent customer service and breeding superior orchid hybrids for the orchid enthusiast.

Backed by over 26 years of experience in the horticultural industry as a professional grower and manager, Fred applies these skills to produce well grown and healthy orchid plants.

The nursery has grown considerably over the last few years and we are now exceeding 20,000 sq. ft. of greenhouses space.

We are plant breeders of award quality orchids. Our efforts are focused in the development of new and interesting lines. We provide unique hybrids and species in several genera including; Cattleya, Catasetinae Paphiopedilum, Dendrobium, Sarcochilus, and Bulbophyllum.

***He will have plants for sale at the meeting!***

### JOIN THE ORCHID DIGEST CORPORATION

Don't let the name fool you, the Orchid Digest is a non-profit membership-based organization dedicated to orchids. Designed to appeal to the mid-range to advanced grower nothing beats the *Orchid Digest*. For just \$34 per year you get 4 issues of full-color, in-depth articles about orchids. The magazine is large format and the fourth issue of the year is always an extra-special issue devoted to a single genus.

***For membership application forms contact***  
***Fred Missbach (404-237-1694)***

## Club Business

### Dues are Due!

It's that time of year again - time to renew your membership with the Atlanta Orchid Society. Dues are \$30 a year for an individual or \$45 for a joint membership. Make your check payable to the Atlanta Orchid Society and deliver to:

Reba Herzfeld  
4798 Summerset Land  
Dunwoody, GA 30338

### Nominations for Officers

The Society starts it's new year on January 1 - and with a new year, comes new officers. The nominating committee is working hard to assemble a slate of officers to recommend to the membership. If you have a suggestion, please either email or submit the person's name in writing to the Chairman of the Nominating Committee, Margie Kersey. Deadline for submissions is Halloween at midnight.

**Atlanta Orchid Society Monthly Meeting**

**September 14, 2009**

Jeff Whitfield called the meeting to order and welcomed everyone.

**Minutes:** The minutes of the August meeting were approved as printed.

**Treasurers Report:** Reba Herzfeld gave the August Treasures report. As of August 31 we have \$11,329.71 in the bank and a CD with a value of \$21,013.62. 2010 dues are due beginning in October. Reba would like to receive all dues by December 31, 2009.

**Old Business:**

1. Atlanta Orchid Show: The date of the show has been set at March 12-14, 2010. Set up for the show will be Thursday March 11 and breakdown on Sunday evening March 14. We are in need of many volunteers. Terry Glover will be the head clerk, contact him if you are interested in clerking. Maureen Pulignano has graciously agreed to host the appreciation party for volunteers.

**New Business:**

1. Dues are due next month. Membership is \$30 for individuals and \$45 for households.
2. We are working on a re-vamp of the web-page that will include a paypal feature to allow members to pay their dues on line. It will also include a member's only section with the newsletter.
3. The Board appointed the following to the nominating committee: Margie Kersey, Bill White and Cheryl Bruce. Membership ballot was given for an additional member to serve on the committee. Roy Harrow was chosen by ballot to serve.
4. Orchid Digest: Fred Missbach announced that the fees for Orchid Digest have gone up to \$68 for two years. He offered a magazine deal for those who sign up at tonight's meeting.
5. Ed and Annalee Boyett were recognized for their years of selfless and tireless service to the Atlanta Orchid Society and the Judging Center. Fred Missbach presented the Boyetts with the Orchid Digest Diamond Award for their outstanding service. Congratulations to the Boyetts and thanks for your years of service.
6. South Metro Orchid Society is having its annual picnic and Orchid Auction on September 26 at Noon. Bring a covered dish to share and your money.
7. Birmingham Orchid Show is the weekend (September 19-20). Geni Smith and Maureen Pulignano will be doing the Atlanta display. Call Geni or Maureen this week if you have blooming plants you would like to send to the show.

## Class I – Cattleya Alliance

### Blue- *Rhyncolaeliocattleya* Waianae King 'Orchidheights' HCC/AOS – Fred Missbach

This very attractive peach and yellow large-flowered cattleya received an HCC of 78 points in May of 1996 (not an Award of Merit as indicated on the entry form). Like most others in this color range there is a high percentage of *Cattleya dowiana forma aurea* in its background, which is not only responsible for the color, but the fact that it is summer blooming. While other species have been mixed with *C. dowiana* to create compact or cluster blooming yellow to orange orchids that flower at other times of the year, summer is the only season that you will see these colors on large and voluptuous beauties such as these. Some people find the large yellow hybrids a bit reluctant to

coax into flower. The plants will grow well and make bloom sheaths, but no buds develop. The best advice for encouraging a floral show in summer from a *C. dowiana* hybrid is to give it brighter light and less water in winter to mimic the seasonal climate where that species is found in mountainous regions of Colombia. Keep in mind that in our more northerly latitude, the sun angle is much lower in winter, so your plant may need to be moved to a brighter location for that season, and returned to its usual spot as the days grow longer again in spring. Misting or light watering will duplicate the nightly dew that forms in the otherwise drier winter months.

*Rhyncolaeliocattleya* Waianae King  
'Orchidheights' HCC/AOS

### Red – *Cattleya* Dana Rehfield x Taboo – Greg Smith

### White – *Cattleya bicolor* – Fred Missbach

## EVENTS OUT AND ABOUT

**October 12-** AtlOS Meeting

**October 10 -** Atlanta Judging Center

**Oct 10-11 - Gainesville Orchid Society Show**, Kanapaha Botanical Gardens, 4700 SW 58th Dr., Gainesville, FL. Contact: Joan MacLeod, 4411 NW 15th Pl., Gainesville, FL 32605; (352) 375-6744; [neilmacleod@bellsouth.net](mailto:neilmacleod@bellsouth.net).

**Oct 31 - Nov 1 - 50th Anniversary of the Mid-America Orchid Congress and Tenn. Capital Orchid Show**. Franklin Marriott Hotel, 700 Cool Springs Blvd., Franklin, TN. Contact: Steve Burger

& Tom Harper, 9651 Fredonia Rd., Mancester, TN 37355. (931) 394-2713; [gandsgh@blomand.net](mailto:gandsgh@blomand.net).

**Jan 15-17- North Carolina Piedmont Orchid Society Show**, Daniel Stowe Botanical Garden, 6500 South New Hope Rd., Belmont, NC. Contact: Virginia Rappold, 10219 Rocky Ford Club Rd., Charlotte, NC 28269; (704) 912-2536; [vrappold@aol.com](mailto:vrappold@aol.com).

**Nov 14-23, 2011 - 20th World Orchid Conference**, Singapore. [www.20woc.com.sg](http://www.20woc.com.sg)

**Nov 2014 - 21st World Orchid Conference**, Pretoria, South Africa. Check the AOS website!

***Dendrobium Maiden Charlotte***

hold temperatures in the 60 to 85 degree range suite this orchid well, along with partly shady to fairly bright light and regular water year round. Too much fertilizer can be a deterrent to generating blooms, so keep the applications to no more than one quarter strength for best results.

#### **Class IV - Epidendrum Alliance**

**No Entries**

### **Ron McHatton's Winner Notes**

Follow Up on Last Month's Blue Ribbon Winner in Class I - *Sophronitis dayana* 'Leah'

Ron McHatton, PhD is a past ATLOS President, current AOS Director of Education and Regional Operations, and *still* an avid reader of the ATLOS newsletter. After seeing my notes on the naming quandary presented by moving *Sophronitis dayana* to *Cattleya*, he directed me to a publication from the AOS that lists all the old and new names for the species and natural hybrids in the *Sophronitis* to *Cattleya* transfer. According to this list, then new name for *Sophronitis* (formerly *Laelia*) *dayana* is *Cattleya bicalhoi*. You can access this list by visiting: [http://www.aos.org/am/images/pdf/sophronitis\\_to\\_cattleya\\_transfers.pdf](http://www.aos.org/am/images/pdf/sophronitis_to_cattleya_transfers.pdf)

#### **Class II – Cymbidium Alliance**

**No Entries**

#### **Class III – Dendrobium Alliance**

**Blue – *Dendrobium Maiden Charlotte* – Geni Smith**

*Den. Maiden Charlotte* (*aberrans* x *rhodostictum*) is yet another of the 'New Guinea' hybrids that have been making a name for themselves as great, easy growing 'pot plant' orchids. The plant exhibited is just reaching flowering size and once the many growths become old enough to make buds, it can be in bloom for most of the year. This type of *Dendrobium* does not bloom on mature growths the first year, but makes spikes repeatedly from the near the apex of older growths for many years, even after the ever-green leaves have finally fallen off, which is normally three or four years from when a growth was produced. The result is that with time and patience you have a very bushy plant with many inflorescences at once, particularly from fall through spring. Typical house-

As this transfer of all *Sophronitis* to *Cattleya* seems to be the 'final solution' to the name changes in the *Cattleya* Alliance, and has the support of both the AOS and the RHS, I encourage everyone to take the time to correct their plant tags and enter their plants under the currently accepted names for monthly ribbon judging. If in doubt as to what that would be, you can search the international orchid register using this page from the RHS web site:

<http://www.rhs.org.uk/plants/registerpages/orchidsearch.asp>

For instance, if you still have a plant labeled "*Brassolaeliocattleya* (*Blc.*) Goldenzelle" you can enter Goldenzelle into the "Grex" box on that page and find out that the correct registered name would be *Rhyncolaeliocattleya* (*Rlc.*) Goldenzelle.

## Class V – Oncidium Alliance

### Blue – *Odontocidium* Space Tiger – Gene Gadilhe

This recently registered hybrid (2007) is a play on the names of its parents (*Oncidium Sphacetante* x *Odontocidium* Tiger Hambühren) and of its grand parent *Oncidium sphacelatum*, a warm growing species that brings adaptability to our climate despite having a good percentage of cool growing *Odontoglossum* species in its ancestry. Like other hybrids in this group with similar heritage, it wants a combination of plenty of water and perfect drainage, with repotting regularly, particularly if any signs of salt build up in the media are present. Mounted culture is an option, but would normally mean daily watering in summer and possibly even twice daily when it is both hot and dry. Reduce water with the shorter, duller days of winter, but do not permit the media to become completely dry. It is also a good idea to withhold fertilizer when the plants are not actively growing.

### Red – *Miltonia* Belvedere ‘Best’ x *Miltonidium* Star of Nuuanu ‘Britt’ AM/AOS – Gene Gadilhe

### White – *Miltassia* Dark Star ‘Darth Vader’ AM/AOS – Ellen Brand

*Odontocidium* Space Tiger

*Doritenopsis* I-Hsin Symphony

## Class VI – Cyripedium Alliance

No Entries

## Class VII – Phalaenopsis Alliance

### Red – *Doritenopsis* I-Hsin Symphony – Geni Smith

The miniature *Phalaenopsis equestris* appears on both sides of this hybrid’s family tree. It has been combined with several species of fuller form and richer color to create one of the newer mini’s that looks more like a scaled down version of the larger, traditional *Phalaenopsis* hybrids. This is a fairly good example of this fairly recent trend breeding trend, which hopefully will yield a wider range of colors in coming years. Of the more than 500 first generation hybrids made with *Phal equestris*, nearly three quarters have been registered in just the last 20 years. Its ability to produce large numbers of petite flowers on inflorescences that are both arching and branched is the primary reason for its current popularity as a parent.

### White – *Phalaenopsis fasciata* – Geni Smith

*Plectrelminthus caudatus*

*Anguloa clowesii*

stay too wet in winter or rot can be a problem. *Anguloa* are related to *Lycaste* and there are a number of man-made hybrids between the two genera.

**Red – *Bulbophyllum dearei* – Barbara Baines**

## **Class VII – Vanda Alliance**

**Blue – *Plectrelminthus caudatus* – Doug Hartong**

This African species is the only member of its genus, which was separated out from *Angraecum* and *Aerangis* because it has a complex and distinct column and associated pollinia. The genus name refers to the twisting worm-like nectary, which is a prominent feature of its non-resupinate flowers. All sources recommend warm, bright ‘vanda’ culture with fairly frequent watering and good humidity, making this orchid a poor candidate for culture inside the home or under lights. But if you have a greenhouse, the long lasting, unique, fragrant flowers and compact growth habit make it a great addition to your collection.

**Red – *Perrieraara* Motes Leprechaun ‘Haiku Mint’ HCC/AOS – Doug Hartong**

**White – *Gastrochilus japonicus* – Cora Ramborger**

## **Class IX – Miscellaneous**

**Blue – *Anguloa clowesii* – Cora Ramborger**

This large cool growing terrestrial orchid from Venezuela and Colombia is not frequently seen in this region due to its specific cultural needs. It normally occurs at elevations from about 5,000 to 8,000 feet above sea level where it receives year round temperatures in the low 50’s at night and around 70 during the day. In order to accommodate its preferences here in the hot, humid Southeast, it would normally be grown directly in front of an evaporative cooler where it would appreciate the high humidity and fresh cool airflow. If you have the space and conditions to keep it healthy, the reward is in the large, strongly fragrant, bright yellow flowers borne singly on inflorescences about a foot high that resemble waxy tulips. Flowers normally occur with the onset of new growth and the peak flowering season is May and June. While the natural habitat provides ample moisture from either rainfall, dew or condensation year round, here in our more northerly latitudes care must be taken not to allow the deciduous plants to

**White – *Zygopetalum* Jumping Jack – Fred Pippin**

# Visit to Sunset Valley Orchids

By Calvin Starr

My son and his wife had promised to take two of our grandkids to San Diego this summer to visit the zoo, the beach and other attractions. Since they would be gone during my birthday they gave Beverly and me tickets to come along. We would miss the August meeting and the workshop so I decided to see what orchid nurseries were close by to provide my monthly orchid fix. Boy did I hit the Jackpot. Within 40 miles of our hotel were Sunset Valley Orchids and Andy's Orchids. Both require an appointment and I got lucky that the time slots I had available were also good for them. Sunset Valley Orchids is owned by Fred Clarke, our HOS speaker for November, and a highly regarded hybridizer. Fred is well known for his Cattleya hybrids and his widely acclaimed black Catasetum hybrid, Fredclarkeara After Dark (Mo. Painted Desert x Ctsm. Donna Wise). Five of Fred's After Dark hybrids have received FCC/AOS awards.

Sunset Valley Orchids consist of 4 modern greenhouses covering about 28,000 square feet and the space is optimized by using rolling benches. The greenhouses use water walls and swamp coolers for cooling and are also equipped with heaters for those occasional cool spells they have in Southern California. To water the plants Fred has a 1000 gallon per day Reverse Osmosis Water system and he hand waters all of the orchids twice a week. He uses a custom version of MSU fertilizer that is blended for hot weather. Fred says that watering is the most important part of successfully growing orchids.

Sunset Valley Orchids offers many of Fred's crosses in 3 inch pots at a very reasonable price. There were several of the 3 inch plants in bloom when we visited and the quality of the plants is excellent. If you like spotted cats, have a look at his web site, <http://www.sunsetvalleyorchids.com/>. I did not purchase any plants while I was there, but I have a list that I will be sending to Fred to bring to Houston when he comes in November. I would like to Thank Fred for the time he spent with us. The nursery visits were a highlight of the trip.

**The author is Calvin Starr, webmaster for the HOS, who recently took a trip with his family to California. He was able to visit Sun Valley Orchids and Andy's Orchids. The text appeared in the October HOS newsletter which is on the Affiliated Societies Forum under Society Newsletters**

*\$2 from each calendar sold benefits orchid conservation*

## Newsletter Submissions

To submit material for the newsletter or to sign up for the email version of this newsletter, please contact Margie Kersey. The deadline for submission is the 20th of each month.  
Margie@callkbs.com

The Atlanta Judging Center meets and reviews plants on the second Saturday of every month in the basement at the Atlanta Botanical Gardens. Exhibitors and visitors are allowed to sit in the training sessions and to observe the judging. This is a great way to learn more about orchids and the entire judging process.

# AtLOS Big Winner in Birmingham!

Big thanks to everyone who brought plants for the show in Birmingham! We won several awards thanks to all of you! Special thanks to Roy Harrow who safely delivered the plants and to Geni Smith and Maureen Pulignano who installed the display.

## AWARDS

### Society

Best in Class Trophy  
Orchid Digest Trophy

### Individuals:

Bob Grzesik	1 Blue, 1 Red
Roy Harrow	1 Blue, 1 Yellow
Doug Hartong	3 Red, 1 Yellow
David Mellard	2 Blue, 1 Trophy
Fred Missback	1 Yellow
Maureen Pulignano	3 Blue, 6 Red, 1 Yellow
Cora Ramborger	1 Yellow
Geni Smith	2 Blue, 3 Red, 1 Yellow
Paul Thurner	1 Yellow

*Continued from page 2*

- The 50<sup>th</sup> Anniversary Mid-America Orchid Show is in Nashville October 31-November 1.
- Newsletter: Atlanta Orchid Society produces one of the finest newsletters in the US. Margie Kersey has been working tirelessly as the newsletter editor but needs to give up this duty soon. Contact Jeff if you are interested in working on the newsletter. Margie will help to train the new editor on the PDF format and software will be provided. Reba offered a year of free membership to a member who serves as the newsletter editor.

**Ribbon Judging:** Doug Hartong presented the monthly Ribbon judging results. Congratulations to those who won and thanks to all who brought plants.

**Speaker:** The speaker for the evening was Mr. Howard Gunn and he presented slides and discussion of *Bulbophyllum* species and their culture. He stated that he grows primarily in New Zealand sphagnum moss because it holds moisture better than bark. He waters every other day because it is so dry in Sacramento California where he lives. He grows species from South East Asia and Africa in his collection. He offered to sell divisions of plants if anyone is interested.

We thank those who brought refreshments: Geni Smith, Doug Hartong, Cheryl Bruce, Reba Herzfeld, Cora Ramborger, Terry Glover, Bob Grzesik, and Marianne Gilmore.

Thanks to Hal Morrison who brought plants for the raffle table. Roy conducted the plant raffle and the meeting was adjourned.

Respectfully submitted,

Cheryl Bruce, Acting Secretary

It's a hanger for flower pots!! It's the first time I have ever seen one that could hang from a tree. Very cool!!

# THINGS YOU MIGHT HAVE MISSED IN SEPTEMBER

If you missed Howard Gunn's presentation, you missed a great show! Mr. Gunn is knowledgeable and extremely funny - a great combination for learning.

Having student judges in our Society sure is handy when you have questions! Thanks Doug for being so patient.

Happy birthday to you, happy birthday to you, happy birthday, dear Geni..... How old are you now? Ok, we didn't ask, but that was because she was sweet enough to share her birthday cake with everyone!

Pop quiz - do you know what she got for her birthday? (answer on page 9)

Congrats to Ed and AnnaLee Boyett - the first AtlOS recipients of the Orchid Digest Diamond Award of Excellence for their outstanding service to our Society, presented by Fred Missbach. Well Deserved!!

## Join the Atlanta Orchid Society

Membership in the Atlanta Orchid Society is \$30 for individuals or \$45 for households. Yearly membership runs January 1 through December 31. Anyone joining in the third quarter will get a 50% discount on the current year's membership. Anyone joining in the fourth quarter will purchase a membership for the following year. You can join at one of our monthly meetings, or contact the society's Treasurer (see page 2) for a membership application.

For directions to the Atlanta Botanical Garden, please visit their website at [www.atlantabotanicalgarden.org](http://www.atlantabotanicalgarden.org)

Last month Howard Gunn spoke to our Society, but did not bring any plants. Many members were disappointed, so here is a list of items Mr. Gunn has available. Please contact Fred Missbach or Mr. Gunn directly with your order.
